# HEAT PUMP WATER HEATER REBATE APPLICATION

FOR SNOHOMISH COUNTY PUD CUSTOMERS ONLY

## To Apply for a PUD \$500 Rebate:

Fill out this form completely front and back, including all required signatures, and return it along with a legible copy of the purchase receipt that shows brand, model number, and date of purchase and manufacturer's installation checklist (found in the product manual).

Please return this completed, signed application with accompanying paperwork to: Residential Energy Services (E2), Snohomish County PUD, PO Box 1107, Everett WA 98206-1107 OR ce@snopud.com (scanned documents).

All paperwork must be received within 90 days of purchase. Keep a copy for your records. Allow up to 60 days for processing.

## ASSIGNMENT OF REBATE PAYMENT

Homeowner Receives PUD Rebate

Homeowner Assigns PUD Rebate to Alternate Payee (Contractor)

(IMPORTANT - MUST PROVIDE COPY OF ALTERNATE PAYEE'S IRS W-9, NOT REQUIRED FOR PUD REGISTERED CONTRACTORS.)

Homeowner's PUD Account Number  
(see PUD bill)

TANKS R US

Alt. Payee's Business Name (Must Match W-9)

### Assignment of Funds Agreement (if applicable)

Public Utility District No. 1 of Snohomish County ("PUD") is hereby authorized to pay the Alternate Payee, in the name of the Assignor (Homeowner) the rebate payment due the Assignor for the project at the address identified on page one. I understand the Name entered must be identical to the information on the W-9 form. I understand that I will be responsible to pay any additional balance due directly to the Alternate Payee. I understand that initiating this Assignment of Funds Agreement is entirely optional and will not affect my ability to participate in PUD Energy Efficiency Programs.

Homeowner Initials: RM

If submitting electronically: By checking this box, you are providing an electronic agreement

## TERMS AND CONDITIONS

**REBATE ELIGIBILITY:** To be eligible for rebate, the homeowner ("Homeowner") must be a customer of the Public Utility District No. 1 of Snohomish County (the "PUD") and the installation address must be in the PUD's service area. Only single-family residences (1-4 units) qualify. One rebate per household. The following documents must be enclosed and postmarked within ninety (90) days of the heat pump water heater purchase date to be eligible for rebate payment: a completed rebate application, a copy of the purchase receipt or invoice, and a completed manufacturer's checklist (found in the product installation manual). The new heat pump water heater must replace an existing electric storage water heater, be ENERGYSTAR® rated and on the PUD's list of qualified models (available at [www.snopud.com/hpwh](http://www.snopud.com/hpwh)), and be installed in accordance with manufacturer's specifications by an installer who has received manufacturer training. Allow up to sixty (60) days for qualifying rebate to be credited to Homeowner's PUD electric bill. Homeowner is responsible for any late fees incurred for non-payment of invoiced amounts due while the rebate is being processed. Homeowner acknowledges that rebate program is a limited offer and subject to availability of funds, and that rebate amounts are subject to change.

**PAYMENT FOR INSTALLATION:** The Homeowner is responsible for paying the Contractor, if applicable.

**HEAT PUMP WATER HEATER SELECTION, INSTALLATION, OPERATION, AND MAINTENANCE:** The selection, purchase, and installation of the Heat Pump Water Heater shall be the sole responsibility of the Homeowner. Installation is to be in accordance with PUD specifications, codes, and manufacturer specifications. The Homeowner must rely upon the contractor, if applicable, regarding any representation or promise about the materials or labor required for installation of the Heat Pump Water Heater, the cost of such Heat Pump Water Heater, including materials and labor, and any energy savings that may accrue for the installation of the Heat Pump Water Heater. THE PUD MAKES NO WARRANTY WITH RESPECT TO THE HEAT PUMP WATER HEATER, EXPRESSED OR IMPLIED, AND SPECIFICALLY DISCLAIMS ANY WARRANTY OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE AND ANY LIABILITY FOR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF, OR THE INABILITY TO USE THE HEAT PUMP WATER HEATER. Any required maintenance, repair, or replacement of the Heat Pump Water Heater shall be the sole responsibility of, and at the expense of the Homeowner.

**VERIFICATION, INSPECTION, EVALUATION AND ACCESS:** Participating homes are subject to random on-site inspections in order to verify that installation and the home meet program eligibility guidelines. No warranty is implied by this inspection. The Homeowner agrees to provide reasonable access to the property for the purposes described herein if contacted to schedule an inspection. The PUD may contact the Homeowner for survey participation and program feedback. In addition, the PUD may release the Homeowner's account information, including billing and energy usage information, to an independent third-party evaluator solely for the purposes of evaluating this program, confirming energy savings, and for other quality assurance purposes.

**TAX LIABILITY:** The PUD is not and will not be responsible for any taxes (federal, state, and/or local) that may be imposed on the Homeowner because of the receipt of rebate funds.

**FACSIMILE/SCANNED:** Facsimile transmission of any signed original document, and the retransmission of any signed facsimile transmission, shall be the same as delivery of the original signed document. Scanned original documents transmitted to the PUD as an attachment via electronic mail shall be the same as delivery of the original signed document. At the request of the PUD, the Homeowner shall confirm documents with a facsimile transmitted signature or a scanned signature by providing the original document.

**COMPLIANCE WITH LAWS:** The Homeowner represents and warrants that the Homeowner, its agents and employees, and any Contractor or sub-contractor it may retain to install or maintain the Heat Pump Hot Water Heater are, or will become, familiar with and will at all times comply with all applicable equipment manufacturer's instructions, federal, state, and local laws, codes, ordinances, rules and regulations pertaining to the installation, maintenance, operation, and use of the Heat Pump Water Heater.

**DISCLAIMER AND INDEMNITY:** Homeowner understands that the PUD is providing funding for kilowatt-hour savings only; and that the PUD assumes no liability for Homeowner's voluntary decision to participate in the program, for the Heat Pump Water Heater selected by the Homeowner, any third parties selected by the Homeowner to install such Heat Pump Water Heater, or any disputes arising out of repair or replacement of the Heat Pump Water Heater installed. Furthermore, in consideration of the PUD providing a rebate for the installation of the Heat Pump Water Heater, the Homeowner agrees to hold harmless, indemnify and defend the PUD, its officers, employees, and agents, from any and all claims, losses, actions, suits, liabilities, damages, judgments and expenses (including costs and attorney's fees) of any nature whatsoever, or allegations thereof, arising directly or indirectly out of or in any way connected with any act, omission, fault or negligence of the Homeowner or any third party selected by Homeowner to install the Heat Pump Water Heater; except in the event of concurrent negligence of the PUD, the PUD's obligations shall apply only to the percentage of fault attributable to the PUD, its officers, employees, or agents.

**By signing below, Homeowner agrees to the terms and conditions above and certifies that all information provided herein is true and correct.**

Electronic Signature: By checking the Signature box, inserting my name on the signature line, and submitting the form electronically to the PUD, I certify that I understand and agree to the above terms.

# Attention Installer

For service please call:  
1.888.4GE.HEWH (1.888.443.4394)

## Required clearances:

There must be a 7" (17.8 cm) clearance between any object and the rear and sides of the water heater in the event service is needed. A minimum 8" (20.3cm) clearance above the water heater to remove the filter for cleaning and for service access, and clear access to the front of the water heater, is recommended. Installations that require 6" clearance on the sides or rear of the water heater for earthquake straps are also acceptable. **In these cases, additional clearance must be provided on the opposite side of the unit to allow for service access.** The hot and cold water plumbing and electrical connections must not interfere with the removal of the filter.

If a separate GE ducting kit is purchased, additional space is required above and to the rear of the water heater for installation. Consult the ducting kit manual for specific instructions.

Model appearance may vary.

## TYPICAL INSTALLATION

## Room size:

Because this unit draws in air from the room to heat the water, the room must be at least 10' x 10' x 7' (700ft<sup>3</sup>) [3.05m x 3.05m x 2.13m (19.82m<sup>3</sup>)] or larger. If the room is smaller there must be a louvered door or a GE ducting kit installed.

## Protect Unit:

During installation cover and protect upper part of the unit from potential installation debris.

## Installation Checklist:

1. **Tank location:**
  - Does room size require louvered door, ducting, or similar ventilation? 10' x 10' x 7' (700 cu. ft.) or 240 square inches (0.15 m<sup>2</sup>) open air-flow area needed.
  - Back of unit **away from wall** by 7 inches (17.5 cm), and sides have at least 7 inches (17.5 cm) clearance. (6 inches clearance for earthquake strap installations).
  - **Front** of unit is free and clear.
  - Is the water heater **level**? If no, add shims under the base of the unit to ensure proper function of sensors.
2. Verify **Air Filter** is installed. (Located in packaging).
3. **Plumbing connections:**
  - Does not prevent **air filter** removal.
  - No leaks after **filling** the tank with water, either when water is flowing or not.
4. **Condensate lines are in place:**
  - Main flexible or rigid drain line installed and directed to a drain or condensate pump. Reducer fittings are not recommended.
5. **Temperature and pressure-relief valve** is working and drain line completed per local code.
6. **Electrical:** Verify 208/240 VAC to L1 and L2 at tank.
7. **Electrical connection** does not prevent air filter removal.
8. Verify **control panel** displays 120°F (49°C) Hybrid mode. Assist user in how to adjust temperature and modes (see "About the Water Temperature Setting" section on page 7 of the Owner's Manual).

## Normal Startup Conditions:

Once the tank is full and power is energized, you may experience the following:

Elapsed Time	HEWH Actions	Comments
0 to 2 minutes	Unit will go through self-check.	This 2-minute off-time prevents compressor damage.
2 to 22 minutes	Compressor and fan turn on.	This 20-minute period is used to ensure the tank is full of water (Dry-fire prevention algorithm).
22 minutes and beyond	Compressor and fan turn off, heating elements turn on. After initial heat-up, elements turn off and compressor turns on.	The water heater is operating in Hybrid mode, quickly providing an initial amount of hot water before switching to the efficient heat pump for the majority of heating.

NOTE: Heat Pump operating range is 35°F - 120°F (2°C-49°C)
