

# Water Service Application and Agreement

Property owners requesting a connection to the Public Utility District #1 of Snohomish County (PUD) Water System agree to:

- ▶ Furnish the property tax account number and address of the premises to be served.
- ▶ Specify the location and size of the service.
- ▶ State fully the purpose(s) for which the water is to be used.
- ▶ Pay all charges for the new service connection.
- ▶ Provide all approved construction plans and permits when requested.
- ▶ Adhere to all requirements as set forth in the most current version of the PUD's Policies and Procedures for Administration of Water Services.
- ▶ A cross connection inspection, installation of an approved backflow prevention device, and annual testing of the backflow prevention device at the owner's expense is required if any of the following exists: irrigation, fire sprinkler system, booster pump, boiler, swimming pool, hydronic heating, auxiliary water source, or any other connection to a non-potable system of any type.
- ▶ Upon installation of service, provide full payment of all charges for the new water service and connection, or any changes to an existing water service. In addition, pay the PUD monthly minimum charge regardless of use.

As a condition of service, the PUD may:

- ▶ Disconnect the domestic water supply for non-payment of any water charges or combined utility charges.
- ▶ Disconnect the domestic water supply for non-compliance with the PUD Cross Connection Control Program.
- ▶ Temporarily shut-off any service at any time without notice for emergency repairs.

New water service for FIRE SERVICE only:

- ▶ Property owner agrees that the water used from this service is exclusively for a fire-suppression system. If it is determined that any water use is for other than fire suppression, the PUD will require removal and replacement of the fire meter with a domestic or combination (fire/domestic) meter, at the property owner's expense.

- ◆ **Is the pressure under 30 PSI?** If so, the property owner shall have an executed Booster Pump Agreement in place and provide, install, own, and maintain an individual water service booster pump (IBP) upon owner’s property in order to obtain and maintain water service pressures exceeding 30 pounds per square inch (PSI).
- ◆ **Is the pressure over 80 PSI?** Pressure reducing valves (PRVs) protect your plumbing and appliances from damage due to high water pressure. A PRV should be installed when the water pressure at a service location exceeds 80 PSI.

For pressures greater than 80 PSI, the property owner may select one of the following options or choose to install both for additional protection of the private service line and home plumbing:

- At the time the meter is installed, the PUD will install a PRV on the PUD-side of the water meter, for a one-time fee (see Appendix B. Table B-1). Upon installation of the PRV, the PUD will be responsible for the PRV repair and/or replacement at no cost to the property owner, subject to the limitations set forth in Section 2.3.4. ***The PUD’s responsibility and liability for maintaining PUD-owned pressure reducing valves for individual homes shall be limited to replacement of the device upon failure.*** If the PRV is not installed by the PUD at the time of meter installation and the owner later requests the PUD to install the PRV, the full cost of installation will be charged to the owner rather than the set fee.
- The property owner may install his/her own PRV or have a plumber install it on the owner’s side of the meter at owner’s expense. In this case, the owner is responsible for maintenance, repair and replacement of the PRV.

**Is your service line over 500 feet?**    Yes    No

The PUD will maintain water quality in accordance with drinking water standards up to the PUD’s meter, and the Customer shall be responsible to maintain water quality in the service line beyond the meter.

**Lake Roesiger Water System customers only:**

- I agree to sign a PUD Pumping Contract and abide by the conditions set forth in the Lake Roesiger Water Service Application.

**Monthly Customer Charge:**

- I am aware of a monthly customer charge(s) associated with this water service and agree to pay it regardless of use.

I, the undersigned owner or owner authorized representative agree to comply with all terms, conditions and policies of Public Utility District No. 1 of Snohomish County relating to this service connection and providing water to the premises identified herein. Further, if I am a representative of the owner, I certify that I am authorized by the owner to sign this Water Service Application and Agreement on the owner’s behalf.
